

eCellar™ Events Manager

Never have out-dated events on website again! Create, edit and post events to your website anywhere, anytime. And best of all—past date events drop off your events page automatically.

Feature

Benefit

Create, edit, and delete events via Administrative Control Panel in an easy-to-use use template with WYSIWYG tools panel

Users don't need to know html or other complicated programming code to create and post events – simple knowledge of popular word processing software is all that is needed.

Automatically removes expired events from online display

Prevents winery from displaying past events – keep event information fresh and timely.
