

eCellar™ Inventory Manager

Manage winery inventory in real-time across multiple storage facilities and access data easily from any internet connected computer.

Feature

Benefit

Supports multiple facilities and locations	Inventory storage location decisions are not limited by inflexible software. eCellar allows inventory tracking in real-time for all storage facilities including one or more tasting rooms, warehouses, and/or fulfillment centers. Client sets up inventory tracking that best suits how they store and manage inventory.
Can be used to inventory wine, non-wine, bundles, supplies & promotional material	Supports a wide range of business uses to increase ROI of the module and simplify the overall management of wine inventory.
Supports tax-paid and in-bond locations	Flexibility that works with the wineries business and supports the unique tracking requirements presented when wine moves from bonded storage to tax-paid and sold.
Reports gallons and liters sold for state-compliance reporting	Support complex state-level tax reporting.
Tracks on-hand, on-order, on-hold, and available at location & SKU level	Provides important data in metrics required for all business needs including sales and compliance.
Retains a detailed history of activity across all transaction points	Allows financial and tax managers to go back and research and review data as needed.
