

eCellar Payment Gateway Manager

A fast and secure connection between your sales channels—online, back-office and/or tasting room— and your bank merchant account

Feature	Benefit
Supports multiple payment gateways— Authorize.net and YourPay.net	Supports two of the most popular gateways and allows winery flexibility to chose different gateways by channel if desired.
Low one-time set-up fee with no additional monthly charges	Simple and affordable pricing saves you time on monthly invoice reconciliation and increases profitability.
Payment gateway can be set-up at the transaction point/channel and the number of transaction points is unlimited	Provides flexibility and scalability responsive to your wineries business strategy and growth.
Choose capture/funding protocols by channel	You can choose how and when to capture funds by transaction/ channel. For example tasting room sales can capture funds immediately in real time while allocation orders can be settled in an authorize then capture mode so orders can be reviewed and edited after received.
Payment gateway is running on eCellar’s triple redundant servers	Enjoy increased speed and reliability with eCellar. Payment gateway is resident on our servers and transactions run through our network lines—not your local phone lines. Downtime is reduced and processing speed is increased.
Easy set-up and migration	If you are not currently using Authorize.net or YourPay, our carefully chosen partner, Payment Logistics, will guides you through every step of the process. Payment Logistics will help you choose which (or both) provider is best for you and will handle all the details to make your conversion seamless and trouble-free.
